Other lens possibilities for use with rotaFoot with accessory lens boards :

We have lens boards that allow use of some manufacturers medium format lenses such as Pentax 645, or Hasselblad V in conjunction with rotaFoot mounted bodies.
These lenses have manual aperture control and 70mm + image circles.

Recommended:

● Pentax 645 lenses :

HD Pentax D FA645 35mm F3.5 AL(IF)

● Hasselblad V lenses:

40mm CF lenses especially the latest model.

50mm CF lenses especially the latest model.

● Canon TSE lenses (*) :

Also for FF mirrorless, the Canon TSE lenses do quite well with good movement.
We have an optional Aperture Control lens board for these lenses.

17mm TSE

24mm TSE

50mm TSE

90mm TSE

135mm TSE

(*) Warning : ARCA-SWISS does not guarantee the infinity focus of Canon lenses with the following bodies :
Sony A7RIV, ... due to a conflict between the mirrorless camera grip and the ARCA-SWISS Front frame.

For this same reason, some mirrorless cameras will see their possibility of shift reduced. :

Leica SL series, Fuji GFX S series,

Also note that rotaFoot Leica M is not compatible with Canon Lenses.
